OVATION AWARDED 2007 GETTHERE LUMINARY AWARD

New York, February 5, 2007 – Ovation Travel Group, the 11th largest corporate travel management company in the United States, announced today it has been awarded a 2007 GetThere Luminary Award for “Best Use of New Features”. The Award recognizes that Ovation implemented GetThere’s enhanced user interface as well as multiple system upgrades and tools in order to improve its clients’ overall online booking experience. In addition to creating an even more convenient platform for online users (thus saving users time), Ovation’s clients have seen significant cost savings as a result of increased online adoption and reduced transaction costs.

“We are thrilled to be receiving this award,” commented Paul Metselaar, Chairman and CEO, Ovation Travel Group. “GetThere is an exceptional product which allows us to customize the tool to meet the needs of our clients. Flexibility is an invaluable part of our business and GetThere allows us to accommodate our clients’ diverse requests”.

In 2006, Ovation increased the number of clients who have opted to implement an online booking tool by 80%. The company achieved a 107% increase in the number of online transactions in 2006 compared to 2005. Through customizations of the tool, Ovation has enabled its clients to access unique features including searchable Webfares from multiple sources, the ability to book Amtrak and Eurail, a pre-trip authorization procedure, and integration capabilities with expense management systems. Additionally, GetThere has added extra features such as the ability to check surrounding airports, search pricing for flexible itineraries and express access without login when set up through a client’s local server.

“We’ve worked diligently to customize this product to ease the online booking process for our travelers,” commented Julie Piro, Director of Online Technologies at Ovation. “By embracing the multiple online options GetThere provides, we were able to take the tool to the next level. Online adoption is up, which confirms that the new GetThere features are working for our travelers.”
